Laughing Kookaburra			
Superb Fairy-wren			
Red-backed Fairy-wren			
White-browed Scrubwren			
Striated Pardalote			
Lewin's Honeyeater		Total species observed:	43

The following codes indicate type of observation, if necessary; H = specific birdcall heard O = flying overhead No numerical entry in the code column indicates at least one bird of the named species was detected.

General comments: Striated Pardalotes were nesting in a hole in a concrete, waterway culvert. Musk Lorikeets were feeding in an eucalypt. The Eastern Rosella was a known escapee living in the area over some years.
