Spangled Drongo	
Willie Wagtail	
Torresian Crow	
Black-faced Monarch	
Spectacled Monarch	
Magpie-lark	
Silvereye	

Common Name	Code
Welcome Swallow	
Common Myna	
Total species observed:	28

The following codes indicate type of observation, if necessary; H = specific birdcall heard O = flying overhead No numerical entry in the code column indicates at least one bird of the named species was detected.

General comments: Very poor birding conditions yet a surprising 28 species observed over the hour in the bushland adjacent to and including the Nundah Cemetery. The usual aim to include Zion Hill Bushcare Group site at Albert Bishop Park and the walk along Shultz Canal was not covered.
