Tree Martin	
Common Myna	
Total species observed:	49

The following codes indicate type of observation, if necessary; H = specific birdcall heard O = flying overhead No numerical entry in the code column indicates at least one bird of the named species was detected.

## **General comments:**

Five regular birders met at the Nudgee Waterhole and were pleased to welcome newcomers, Pamela Farmer, Marilyn O'Sullivan and Helen Underwood.

With 49 species observed this was a very good count and of particular interest was the number of Dollar birds and Rainbow Bee-eaters. Water birds and waders were scarce due in part to the extremely high king tide we experienced on the day.
